(ISSN 1939-1404)

SPECIAL ISSUE ON ADVANCES IN SAR AND RADAR TECHNOLOGY

Compensator distributions in self-clustering active-localization method in singularity-spreading phase unwrapping shown for various singularity-release timing of (a) 2,000, (b) 10,000 and (c) no release until the end of the spreading. For more information see “Distortion Reduction in Singularity-Spreading Phase Unwrapping With Pseudo-Continuous Spreading and Self-Clustering Active Localization,” by Oshiyama and Hirose, which begins on p. 3846.
